24 Overview of the entity's material responsible business conduct issues

Please indicate material responsible business conduct and sustainability issues pertaining to environmental and social matters that present a risk or an opportunity to your business, rationale for identifying the same, approach to adapt or mitigate the risk along-with its financial implications, as per the following format

S. No.	Material issue identified	Indicate whether risk or opportunity	Rationale for identifying the risk/opportunity	In case of risk, approach to adapt or mitigate	Financial implications of the risk or opportunity (Indicate positive or negative implications)
1	Environmental norms/ legislations	Risk	New laws related to environment (specifically climate related), CSR activities are being created and enforced. Adherence to these new laws poses challenge.	Our EHS team understands the regulatory requirements to be complied with for the different legal requirements. They also seek help from the Compliance team to understand any specific compliance requirements that may be applicable. These areas are covered under the internal audit program from a compliance point of view as well. As part of sustainability reporting, independent assessments conducted (by external consultants/experts) also help in addressing gaps if any in this area.	Negative Implications

BRSR

2	Regulatory Compliance	Risk	Failure to comply with regulatory requirements can manifest in financial and reputational consequences for an organisation and erode stakeholder trust.	The Company has a robust set of environmental, social and governance-related policies to foster a culture of compliance within the organisation. Disciplinary measures and reinforcement mechanisms have been defined as well. The ESG organogram further highlights the importance of overall compliance by positioning the CS in a key role, ensuring overall corporate governance in all three verticals (ESG). In addition, Legal and functional teams also monitor the regulatory compliances across businesses at defined frequencies.	Negative Implications
3	Scarcity Of Water	Risk	Water is a shared resource, making it important for businesses to use it responsibly. Ensuring responsible consumption is key to the business' social license to operate and a sustainable planet for all.	<p>Mumbai and its suburban areas/adjoining districts receive good rainfall every year and ground water table is recharged. The turbidity of water and the sulphate and iron content in water used for construction may pose a threat to quality of construction (corrosion etc). The cost of treatment of GW, procuring water and non-supply of municipal water will become a high-risk event in the future. KRL and its subsidiaries continues to adopt water conservation strategies across all of the existing project sites and also supplement internal water generation by procuring water from outside agencies.</p> <p>Water being an important resource in construction industry its scarcity may lead to disruptions in operations and delay timelines of project completion.</p> <p>Rainwater harvesting system has been implemented at few facilities which helps in increasing the ground level water. This results in release of sub soil water from recharge pits, and this reduces the dependency on external agencies.</p> <p>The Company has instituted an EHS Policy that highlights the importance of Resource Conservation, this serves as a guiding principle to reduce consumption of water and other resources. The EHS team runs awareness campaigns to ensure that all personnel are aware of the risk related to water shortage.</p>	Negative Implications
4	Human Rights such as child labor, forced/ compulsory labor, health and safety, discrimination and freedom of association and collective bargaining including anti-harassment	Risk	Upholding human rights is essential to protecting organization's communities, employees and other stakeholders.	The Company has constituted a standing forum, both at the Group Level as well as at individual entity level, that aids and advises the management in its approach towards building sustainable Human Rights. Group HR is responsible to ensure that any issue or impact related to human rights are addressed in the defined manner within the stipulated timeline. The Company has a robust contractor management system which ensures human rights practices are adhered to (as per ILO) by the contractors supplying man-power to the Company. We have very stringent norms for child labor, anti-discrimination, forced labor or bonded labor, anti- harassment, workers health and safety and other human rights issues at all project sites.	Negative Implications
5	Economic Performance	Opportunity	Ensuring business profitability and strong economic performance helps deliver value to investors and reinvest in the growth of the business, employees, communities and other stakeholders.	The Company thrives to deliver strong economic performance through our operational practices and risk mitigation strategies that supports the nation building and create a value for all the stakeholders.	Positive Implications

<p>2 a. Does the entity have procedures in place for sustainable sourcing? (Yes/No)</p>	<p>No We are in the process of aligning our procurement practices with the organization's sustainability focus, the green infrastructure imperatives, and the organization-wide application of sustainability. This implies green procurement, with its screeners based not only on quality and cost but also on the environmental impacts of purchase and usage over long term horizons.</p> <p>Some of KRL's completed and existing projects are certified under CII's Green building IGBC certification scheme and achieved silver rating. KRL aims to achieve IGBC certification for all its upcoming projects and aims for gold rating as and where possible, which will propel us further to apply green procurement objectives to our overall procurement strategy. KRL's procurement team is involved actively in identifying and generating green alternatives to traditional purchasing. We plan to actively engage with and influence our supplier ecosystem towards better sustainability in the years to come. We believe in helping our supply chain partners to inculcate sustainable practices and processes in their operations too. Going forward, we are stepping up our efforts in influencing this task in a more tangible way.</p> <p>KRL plans to create a supplier code of conduct in the future. We are in the process of modifying our PO to include the normative clauses on EES parameters such as labor (child labor, forced or compulsory labor), working conditions at supplier sites, health and safety and protection of the environment. This outlines our commitment to make our supply chain more responsible and sustainable. For all purchases, we plan to specifically incorporate sustainable guidelines as part of Purchase Order terms.</p>
<p>b. If yes, what percentage of inputs were sourced sustainably?</p>	<p>NIL. Refer point 2(a)</p>
<p>3 Describe the processes in place to safely reclaim your products for reusing, recycling and disposing at the end of life, for (a) Plastics (including packaging) (b) E-waste (c) Hazardous waste and (d) other waste.</p>	<p>As an environmentally responsible organization, we aim to approach waste management not only through systems and technology routes but also through advocacy and sensitization—thereby influencing behavioral change. Reduce-Reuse- Recycle will be our mantra for waste management.</p> <p>Steel: Unused steel is being sent for recycling through identified and internally approved vendors by Procurement in Head Office</p> <p>Plastic waste: Non-biodegradable plastic waste generated within our establishments is sorted out safely and discarded to designated vendors for recycling/reuse.</p> <p>E-waste: All electronic waste generated within Company premises is discarded within 180 days in accordance with e-waste management rules and is handed over to vendors approved by State Pollution Control Board for recycling.</p> <p>Hazardous waste: All hazardous waste is disposed through the SPCB-authorized vendor as per the regulatory requirements.</p> <p>Other waste: Biodegradable food waste and dry waste from labor camps is being disposed by BMC. Construction debris is sent for landfill through BMC.</p>
<p>4 Whether Extended Producer Responsibility (EPR) is applicable to the entity's activities (Yes/No). If yes, whether the waste collection plan is in line with the Extended Producer Responsibility (EPR) plan submitted to Pollution Control Boards? If not, provide steps taken to address the same.</p>	<p>Not Applicable</p>

3 Are the premises/offices of the entity accessible to differently abled employees and workers, as per the requirements of the Rights of Persons with Disabilities Act, 2016? If not, whether any steps are being taken by the entity in this regard.

Our offices have been designed with a strong emphasis on inclusivity and accessibility. The office spaces are located in buildings provided with Lifts and the floor space is flat wherein any special arrangement is not necessary. We have also provided height-adjustable workstations for better ergonomics and comfort of personnel. Our projects are designed to accommodate the needs of specially-abled persons/customers such as provision of ramps for access, parking spaces for wheel chairs, washroom facilities in common areas.

4 Does the entity have an equal opportunity policy as per the Rights of Persons with Disabilities Act, 2016? If so, provide a web-link to the policy.

Yes, our diversity and inclusion policy has these provisions. Yes, KRL has a diversity and inclusion policy that meets the Rights of Persons with Disabilities Act, 2016. As an inclusive employer, KRL actively encourages the recruitment, development, and retention of people with disabilities, provides equal opportunity in the workplace, and is committed to providing a safe, accessible, and healthy work environment. Recruitment of people with disabilities, in addition to providing necessary and customized support to help them realize their potential, is encouraged at KRL. We also support employees who have acquired disabilities during their employment. This policy is posted on the website.

10 Health and safety management system:

- a. Whether an occupational health and safety management system has been implemented by the entity? (Yes/No). If yes, the coverage such system?
- Yes, KRL has implemented Occupational health and safety requirements in letter and spirit. An EHS policy has been established, and it covers our HO and all project sites. It describes our philosophy and commitment towards managing key aspects of HSE. Regular inspections of critical and hazardous processes are being done at pre-defined intervals by site safety team. Internal audits are conducted six monthly by an external consultant. Detailed risk assessment has been done for all the operations within the project sites, and appropriate control measures are implemented to mitigate the identified risks/hazards. All our project sites and offices including HO are equipped with firefighting and emergency response equipment and systems. Employees and contractual staff including workers are inducted on Health and Safety and receive regular training through various measures such as Tool Box Talk's, classroom trainings and online sessions to raise their safety awareness. Safety posters are displayed across the premises to create awareness. We understand that employee and worker well-being is essential to maintaining our leading business performance. We constantly update and improve the range of physical support we provide to our employees and contractual staff including workers at project sites.

BRSR

b.	What are the processes used to identify work-related hazards and assess risks on a routine and non-routine basis by the entity?	A process has been established for Hazard Identification & Risk Assessment. All the hazards/risks arising out of the operations of a facility are identified and scored based on two parameters (Frequency & duration and severity & likelihood). Detailed risk assessment has been done for all the operations within the project sites, and appropriate control measures are implemented to mitigate the identified risks/hazards. Detailed process/procedure for Hazard identification and risk assessment is documented in our safety manual and available at all sites
c.	Whether you have processes for workers to report the work related hazards and to remove themselves from such risks. (Y/N)	Yes. As described in safety manual
d.	Do the employees/ worker of the entity have access to non-occupational medical and healthcare services? (Yes/ No)	Yes

12 Describe the measures taken by the entity to ensure a safe and healthy work place.

At KRL, our top priority has always been to ensure the safety and health of our team while safeguarding the interests of the communities in which we operate and the clients we serve. We follow the OHS Framework principles in letter and spirit at all our project sites. Our EHS Policy covers all our locations and people - permanent employees, contractual employees, and vendors. We comply with all applicable health and safety regulations as per the BOCWA requirements. KRL has occupational health and safety key matrix with regular monitoring of OHS compliance, near-miss recordings, incident recordings, lost time injury recordings, emergency preparedness, operational controls monitoring and measurement, and training & awareness.

This year, our projects sites independently conducted various programs covering various topics on construction safety, training our people in comprehensive wellbeing, promoting healthy behaviors and safety, preventing, and mitigating several health and safety risk impacts. Total number of 516 Health and Safety awareness trainings and 4247 numbers of toll box talks and safety briefings were conducted across all project sites. 13000 workers were inducted on Health and safety and 170066 number of workers were covered in the safety briefings conducted at project sites. Regular health and safety inspections are conducted at all project sites by our safety team. Last year a total of 115 inspections were conducted.

PRINCIPLE 4: Businesses should respect the interests of and be responsive to all its stakeholders

Essential Indicators

1 Describe the processes for identifying key stakeholder groups of the entity.

Employees, Customers, Investors, Suppliers, Contractors, Government Agencies.

We are an organization born inclusive in nature and purpose. Since our inception, we have included diverse segments of people in our talent pool, contributed to social causes even in tough business climates, treated suppliers like our partners and our customers with dedicated commitment, all along driven by our inclusive values and principles. They indicate how KRL extended its inclusivity to larger stakeholders from the beginning with its insistence on stakeholder identification and engagement.

KRL has identified and prioritized its key stakeholder segments based on their impact on the organization and the organization's impact on them.

Sustainability framework is bringing a formal process to the philosophy already being practiced at KRL. Stakeholder consultation on sustainability aspects although has not been an integral part this year, we intend to make it a key part of the materiality exercise in the next couple of years. We will then also be in a position to determine methods for engaging with our key stakeholders. The wide range of engagement platforms designed will help us in staying connected to stakeholder concerns and expectations from KRL.

These platforms will also work as a source of critical stakeholder feedback for us.

5 Describe the internal mechanisms in place to redress grievances related to human rights issues. **GRC, POSH and through Whistle Blower. Policies have been defined for Grievance redressal of employees. We have defined The Grievance Redressal policy for employees in FY22_23 that is a part of the employee handbook and therefore accessible to all employees. The policy provides the mechanism for reporting and recording grievances and the escalation matrix to resolve the same. POSH Policy is also part of the employee handbook and has been cascaded to all employees throughout KRL and its subsidiaries through a webinar. A well-defined Whistle blower policy enumerates actions to be taken by the employees in case of untoward incidents that demand attention of Top Management. The policy is part of employee handbook and has been cascaded to all employees through a webinar like the other policies for Human Rights to ensure ease of deployment and understanding.**

10 Provide details of any corrective actions taken or underway to address significant risks/concerns arising from the assessments at Question 9 above.

We at KRL are very proactive and vigilant about the workforce deployed at all our sites and have mechanisms in place to ensure there is no child labor or forced labor. Although, the POSH policy has not been cascaded in a formal manner to the workers, we have explicitly communicated the need to raise their voice in-case they have any threat from a person or situation. We follow the diversity and inclusion policy at all our sites in letter and spirit ensuring there is no discrimination. Our contract agreement with labor agencies ensures minimum wages and other benefits (PF/ESIC) are being paid to the workers deployed at our construction sites besides ensuring that all human rights principles as per the ILO and Universal declaration for Human Rights are followed to the utmost extent by our contractor providing man-power at our sites, we have very stringent norms for child labour, forced labour and harassment at workplace and ensure these are complied to without any exception. .

7 Does the entity have any project related to reducing Green House Gas emission? If Yes, then provide details.

The key initiatives contributing to the reduction in Green House Gas emission as part of our IGBSC certification for Green Buildings are:

We are making sustained efforts to Enhance Energy Performance by increasing the percentage of energy efficiency in all our projects by utilizing a combination of different building products, retrofits and designing our homes to ensure maximum day light savings, increased fresh air ventilation, reduced solar heat gain coefficient and optimizing the "u" value.

Some of the building materials being used and promoted at our sites include: Solid Cement blocks, SGU glass, VRF and Roof with 75 mm insulation. We also have Integrated Energy Monitoring System.

In the from of Energy Metering for end uses like common area, exterior area, treated waste water pumping and BMS for HVAC, lighting, elevator, renewable energy.

Further,

1. We encourage green commuters by providing cycle stands and EV charging points at some our residential projects.
2. We continue to encourage the use of clean energy to reduce our dependence on non-renewable energy sources. To achieve our objective, we are exploring various options and alternatives to non- renewable energy sources such as Power Purchase Agreements (PPA) with our service providers, green tariff and solar plants. This shall be institutionalized in the coming FY23-24.
3. We are also focusing on higher ratings for our upcoming residential buildings. All old and new projects owned by KRL are designed according to green building standards for energy and resource efficiency. They have roof top solar photovoltaic installations to reduce the carbon footprint.
4. In FY 2022-23, projects were taken up to improve the energy efficiency in existing buildings as well through retrofits, use of sustainable building materials and other initiatives proposed as part of our green building partners. Our forward-looking goals propel us to not only achieve higher standards of ratings but to also deliver our commitment to sustainable living to all our customers in the coming years.

9 Briefly describe the waste management practices adopted in your establishments. Describe the strategy adopted by your Company to reduce usage of hazardous and toxic chemicals in your products and processes and the practices adopted to manage such wastes.

KRL We are committed to continually improving our Waste management practices at all our upcoming project sites. Our waste management philosophy is based on three principles – Reduce, Reuse, and Recycle. Although we seek to uphold our ambition of zero waste to landfills through active minimization combined with technology investment in recycling and streamlining systems and processes, being in the construction industry the construction debris generated is in large quantities and therefore one of the options for disposal is largely landfill. With our efforts, we plan to contribute to a circular economy and convert waste to resources.

KRL, being an Construction Company, does not manufacture physical products and therefore does not use any hazardous or toxic chemicals in any of its processes. The Company has offices and facility operations, and the waste is generated from the auxiliary processes used to run these facilities.

Based on the nature of services, KRL's facilities mostly generate construction debris, inorganic, organic waste, and building materials (such as steel, MS scrap, wires, wooden scrap, tiles, cables, etc) and generate very less hazardous waste and do not use toxic chemicals. Potentially hazardous and regulated wastes such as paint cans are generated by our contractors that are engaged for painting activities, these cans are disposed through SPCB approved recyclers as per regulations by the contractors as per our contractual requirements.

The organic waste generated within our sites/labour camps are treated in an in-house organic waste composter and converted into manure. Sludge generated from STP is dried and blended with this compost. The manure is being used as fertilizer for landscaping.

The inorganic waste is segregated at source and is disposed of through authorized recyclers. Generated construction waste is disposed to landfill through BMC.

In line with the Central & State Govt. (India) Directives, KRL plans to make all its sites free from 'Single use plastics' through alternative arrangements in FY23_24. We are currently in the process of avoiding single-use food and drink containers and utensils in the cafeteria, meeting rooms, and utmost monitoring is done to minimize the generation of waste.

BRSR

KRL is committed to work on the principle of 3R's – Reduce, Reuse and Recycle in the coming financial year and maximize sustainable usage of raw materials and products to reduce generation of waste. We are also committed to ensure that the hazardous waste generated by our contractors at our sites is disposed as per the HW (management and Handling) Rules.
